Gaming Audio Series™ SP2500
High-Power 2.1 PC Speaker System

SKU Live Date	**January 6th, 2011**
Intro Phrase / Tagline	**The standard for high-fidelity PC gaming audio.**
Product Full Name/Title	**Corsair Gaming Audio Series SP2500 High-Power 2.1 PC Speaker System**
25-Word Product Description	A powerful 2.1-channel PC speaker system for gamers who demand high-fidelity audio, great stereo imaging, and dramatic bass performance.
50-Word Product Description	The Gaming Audio Series SP2500 delivers amazing audio performance. Designed with six Class D amplifiers, high-quality components and powered by a programmable digital signal processor, the SP2500 delivers room-shaking bass response you want without sacrificing the clean, detailed audio reproduction that your games, movies and music demand.
100-Word Product Description	Since you have only one PC speaker system, you don't want to make sacrifices. That's why Corsair has created the SP2500. At its heart are six Class D amplifiers driven by an ultra-efficient power supply. The 8" subwoofer driver is housed in a fourth-order bypass enclosure for clean, tight bass response that can seriously shake the room. The bi-amplified satellites use specially developed 3" drivers and custom-designed, ferrofluid-cooled 1" silk dome tweeters for detailed audio reproduction across the entire spectrum with great stereo imaging and a generous sweet spot. A programmable digital signal processor lets you craft the audio to your liking. It's all under your command with the 1.8" (4.6cm) color display desktop controller.
Product Features	• 232 Watts RMS of continuous power delivery through six Class D amplifiers • 8" subwoofer with durable rubber surround in a fourth-order bandpass enclosure • Bi-amplified satellites with 3" drivers and 1" ferrofluid-cooled silk dome tweeters • Clean, high-fidelity audio reproduction with excellent stereo imaging • Programmable digital signal processor for advanced dynamic audio processing • Wired desktop controller with 1.8" (4.6cm) color TFT display and multi-lingual interface

Specifications

Specifications:

- Frequency response of 35Hz – 20kHz +- 3dB
- 232 Watts of total power (measured via FTC “RMS” method)

Subwoofer:

- 18.1” x 10.2” x 11.7” (46 x 25.8 x 29.7cm) enclosure with fourth-order bandpass design for accurate bass reproduction
- 8” subwoofer driver with durable rubber surround
- Bridged dual 60 Watt class-D amplifiers with integrated DSP for 120W of power (measured via FTC “RMS” method)
- Ultra-efficient integral power supply with 100V – 240V AC input

Satellites:

- Bi-amplified, two-way design with detachable audio cables
- 3” midrange drivers
- 1” custom-designed, ferrofluid-cooled silk dome tweeters
- 4.25” x 4.7” x 6.25” (10.8 x 12 x 15.9cm) enclosures with asymmetrical tweeter placement for superior stereo imaging

I/O, Controls, and Programming:

- PC input on subwoofer
- Dual 3.5mm auxiliary inputs (one on subwoofer, one on desktop controller)
- 3.5mm headphone out with digital signal processing
- Wired desktop controller with 1.8” (4.6cm) color display and multi-lingual interface
- Digital signal processor with active crossover capability
- Mod X™ theatrical audio processing for Blu-Ray and DVD audio that recreates the theatre experience
- Dynamic DSP programs and EQ curves for late night listening, environment simulation, and optimal enjoyment of games, movies, and music

Package Contents:

- x1 subwoofer
- x2 satellites
- x1 desktop controller with 6’ (1.8M) cable
- 3.5mm to stereo RCA cable for PC input
- 6’ (1.8m) satellite cables with ATX connectors
- Power cable
- User Guide

System Requirements:

- Any PC or audio device with 3.5mm line-level output (devices with dual-RCA or other audio output may be used with an adapter cable, not included)
- Firmware updates require an Internet connection and a PC running Windows 7, Vista, or XP
